United Federation of Danish Workers

Danish EPA and the organization had together made new guidelines for use of pesticides with reproductive effects

New investigations show that pesticides
with
active substance as

- Florprimidol
- Imazalil
- Naphtyl acetic acid
- Paclobutrazol
- Tebuconazol

Temporary roles for use

- Warning and displaying
- Protection for mixing, spraying and re-entry
- Substitution

Special roles for use on pot plants, cuttings and cucumbers

- ⊙ Waiting period for pot plants
- ⊙ Waiting period for cuttings
- ⊙ Waiting period for cucumbers

Next step

- ⊙ Information's meetings for the sector
- ⊙ Ban the use of two pesticides in greenhouses
 - ⊙ Tebuconazol
 - ⊙ Flurmidol
- ⊙ Changing endorsement for Naphthyl acetic acid
- ⊙ EPA will look at alternatives to
 - ⊙ Imazalil
 - ⊙ Paclobutrazol
- ⊙ Higher priority of pesticides research

What had been the trade unions role in this process.

- ⊙ Take part of the discussion
- ⊙ Give information's to our members about the risk and how they should take care and protect themselves

Why is it important that represent from trade union take part of this kind of discussion?.

- ⊙ Be sure that the EPA listening to our experience
- ⊙ Be sure that we have the newest information about problems with pesticides
- ⊙ Give proposals for new research areas
